## Pagamentos

The Mamos of La Sierra Nevada de Santa Marta, representatives of the Kaggaba Nation in Colombia, have requested to travel to the Arctic North starting with Iceland and Greenland this year as part of a long-term commitment to offering Earth Payments (Pagamentos) to the Northern natural sites, to support the balancing of the elements which currently are strongly impacting Climate Change events.

*“The snowy peaks of the North have invited us to come to do the pagamentos and help unify the spiritual connection”.*

**This request that has been received from the highest instruction and in accordance with Original protocol.**

**This will be the first time that any Mamos have travelled into the Arctic circle. They rarely leave the Santa Marta mountains unless they deem it of the utmost importance.**

**Pagamentos are very specific and ancient prayers that come from one of this planet’s oldest and unbroken traditions. These prayers have been used for thousands of years to help keep the earth in balance.**

**This is the first of an ongoing commitment to visit the North’s Sacred sites with the Mamos, to not only carry out Pagamentos, but to foster direct relationship with the Kogi Nation and the Elders of the Arctic.**

**Background to the Kaggaba Nation (commonly known as Kogi)**

The Mamos have been invited to participate in the Annual Arctic Circle Assembly, 19th-21st October in Reykjavik, Iceland. The Assembly brings together Indigenous leaders and Youth of the Arctic, Politicians, Scientists and Entrepreneurs that are dedicated to the preservation of its ecosystem and original peoples.

Given their instructions to bring their message to and make relationship with the people of the North, it is a convergence of two important and harmonic missions.

These relationships will move beyond the assembly into long term educational programs for the Youth through the Arctic Portal, where the Kaggaba Nation will be instrumental
